1 13/16" Deep Recessed Grille Mat

This Recessed Grille Mat is a heavy-duty entrance mat that offers ample storage for dirt and moisture with its 1 13/16" deep rails. One inch vinyl cushions spaced 20" on center on the under rail protect the aluminum rails from clanging on the concrete underneath. Heavy support channels and legs allow the grid to be placed over recesses designed as deep as 4 1/4", and, in the most severe climates, can be combined with optional drain pans and strainers that connect to plumbing piping. These grille mats do not roll up, rather the grid sections are lifted out to expose the recessed pit for cleaning. The variety of insert and aluminum finish options offers an aesthetically pleasing product that effectively removes dirt. An architectural bronze connector rail is also available. These mats are capable of handling 400lb per wheel loads.
