

Cocoa Matting / Recessed Cocoa Matting

LEED CREDIT Information

Cocoa Mats are made from coconut fiber husks, a naturally renewable resource. The deep pile construction traps and holds dirt particles below the surface, even in high-traffic areas. Thus, this product may help qualify for LEED Indoor Environmental Quality LEED MR Credit 5 as well as LEED MR Credit 6.

Indoor Environmental Quality Credit 5 (1 point): Indoor Chemical & Pollutant Source Control Cocoa Mat is intended for semi-permanent installation. To qualify for IEQ Credit 5, the product must be at least ten feet in length in the primary direction of travel and maintained on a weekly basis by a contracted service organization. Cocoa Mats may contribute to LEED IEQ Credit 5.

Materials & Resources Credit 6 (1 point): Rapidly Renewable Materials: Cocoa Mat reduces the use of and depletion of finite raw materials and long-cycle renewable materials by replacing them with rapidly renewable materials. 50% of Cocoa Matting is made of natural coir fibers. Coir fibers are considered a rapidly renewable material. Cocoa Mat may contribute to LEED MR Credit 6.
