

Fit-Lock Rubber Tiles

Fit-Lock Rubber Tiles are interlocking rubber floor tiles that easily and seamlessly lock together to protect floors around weight rooms, fitness centers and even home gyms.

Fit-Lock interlocking rubber tiles are made of commercial grade, recycled rubber, giving the matting added strength and durability. Furthermore, these tiles will lay flat, are non-porous and are treated with an anti-bacterial agent.

- These rubber puzzle tiles absorb shock and impact from heavy weights and equipment thus protecting both the machinery and the floor from damage.
- 3/8" thick, 2' x 2' Tiles are 4 SF each and available either solid black or with a 10% color fleck.
- The Fit-Lock's seamless interlocking system, these rubber tiles are easy to install and do not require any adhesives.
- Center, Border and Corner tiles allow for a finished look whether covering a specific area within a room or laying the tiles wall-to-wall.
