

Ford Mustang Car Mats

Ford Mustang Car Mats are carpeted floor mats which are specifically engineered to fit the contours of the floor of each Ford Mustang.

Ford Mustang mats are made with polypropylene in a loop-style surface pattern, to increase crush, soil & stain resistance while offering a 20oz face weight (1/4" thick).

Depending on the model year, there are up to 8 of the most popular Mustang emblems available.

All floor mats come with a matching woven binding.

A Multi-Layer Backing on these Ford Mustang car mats increases durability, moisture protection and traction.

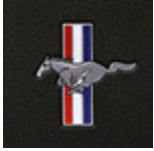

A factory-compatible anchoring device is available for the front seat car mats.
