

Perfec Mat – Aluminum Hinge Metal Mats

Perfec Mats combine aluminum hinge connectors with vinyl/acrylic treads and a variety of insert strips. This design allows dirt and moisture to fall beneath the mat so as to maintain maximum slip-resistance and dirt removal. The Perfec Mat is made for high-traffic, commercial applications yet lighter in weight than traditional all-aluminum mats. This metal mat can be used as either a surface-mounted mat or a recessed (inlaid) mat.

- Tread rails are constructed of 6063-T52 aluminum, spaced 2 inches on center and connected with a size retentive aluminum hinge with 1" x 3/16" slotted holes for improved drainage.
- Inserts are available in carpet, textured vinyl, abrasive grit and serrated aluminum. Replacement strips are also available.
- These metal mats roll back and can easily removed for easy recess cleaning.
- Can accommodate recess depths between 3/8" and 7/16".
- 300 lbs rolling load weight per wheel.
