

Skate Spike Resistant Matting

Skate-Spike Matting is a durable, vinyl matting with a ribbed top surface that minimizes damage to floors from spikes or skates while increasing traction on slippery surfaces. These spike resistant mats are intended for use around skating rinks, locker rooms, and gymnasiums.

- The industrial-grade vinyl construction provides enhanced puncture resistance from spikes, skates and metal cleats.
- The corrugated surface on these skate resistant mats helps contain dirt, debris and moisture from getting on the surrounding floor, thus preventing slip & fall accidents.
- Available 1/4" Thick
- Full rolls & custom sized runners available up to 75' long.
- **Note:** Available 2' wide only in solid black.

Item No: OSSRM
