

AccuPark Garage Floor Tiles

AccuPark Garage Floor Tiles are interlocking 2' x 1' garage tiles that link with the other modular garage flooring to safely alert drivers where exactly to park their vehicle. AccuPark parking garage tiles quickly and easily snap together with other the surrounding tiles without the use of any tools.

The diamond deck-plate pattern on the surface of these parking tiles adds traction to help reduce slips and falls, especially on wet or snowy floors.

AccuPark parking tiles are produced with virtually indestructible PVC which is engineered to hold up to constant usage, even in commercial applications with large trucks and work vans.

Each AccuPark garage tile is 2' x 1' and is 1/2" thick for a seamless transition with surrounding floor tiles.

These tiles come in a kit that allows for installation on any (non-interlocking) generic garage floor for use virtually anywhere, including portable display floors.
