

Elevate AFR Food Processing Mats

Elevate AFR Food Processing Mats are 100% PVC, non-porous drainage mats that are well suited for food production and processing environments. These open grid floor mats are ideal for food processing & preparation areas due to the anti-microbial design, animal fat resistance, easy cleaning and lightweight nature for frequent handling.

Elevate AFR mats are manufactured using non-porous 100% virgin PVC (so as not to absorb any liquids, fluids or animal fats) and is treated with anti-microbial & anti-fungal additives, which last for years, even with frequent cleaning.

The textured surface of these Elevate AFR mats helps reduce slips and falls by increasing traction.

Permanently-welded duckboard design ensures Elevate mats withstand the most heavily-trafficked environments.

5/8" thickness

The oversized drainage holes allow even viscous fluids and by products to more easily fall through while elevating workers and improving airflow.

Elevate AFR mats are compounded to resist a wide range of common oils and fluids. Passes ASTM G21-09.

Thanks to an innovate design, all Elevate AFR mats are strong, yet lightweight and easy to install, move around and roll up for cleaning.
