

## Elevate OR Oil Resistant Mats

Elevate OR Oil Resistant Drainage Mats are industrial-grade duckboard mats designed for use in wet, oily environments, both indoors and outside, to help increase traction and reduce slipping while allowing debris and fluids to drain beneath the walking surface.

Elevate OR mats are constructed of permanently-welded 100% virgin PVC duckboard, which is non-porous and anti-microbial treated.

Superior drainage is achieved through the oversized drainage slats, which allow even the most viscous fluids, debris and byproducts to fall from the walking surface to below the mat, all while maintaining traction thanks to the high-grip surface design.

Elevate mats are compounded to be resistant to a range of commonly found oils and fluids.

Available 5/8" thick.

Elevate OR mats are up to 1/3 the weight of conventional rubber drainage mats, making them easy to install, clean, roll up and move.
