

Non-Slip Duragrid Drainage Mats

Non-Slip Duragrid Drainage Mats are the perfect combination of comfort and traction in a wet area drainage tile. These floor mat tiles help ensure safety on slippery floors by allowing water to drain through the surface, allowing it dry.

- The textured surface pattern provides greater traction, especially when these drainage tiles are wet and are ideal for use around pools, showers, hot tubs and other areas needing superior traction.
- These non-slip Duragrid tiles connect quickly and easily and work well for large areas and non-rectangular configurations.
- Each drain tile measures 12" x 12" and is 1/2" thick.
- Matching color beveled edge reducers are available to help provide a more gradual transition between the floor and the drain tiles. These edges measure 12"L x 1.75"D.

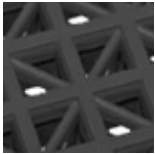

Item No: PDDMNS

Standard Sizes (Approximate)

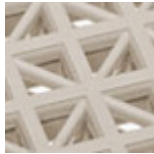

Size	Qty. 1-200	Qty. 201-500	Qty. 501-1000	Qty. 1001-2500
